# What is NSTXL Community

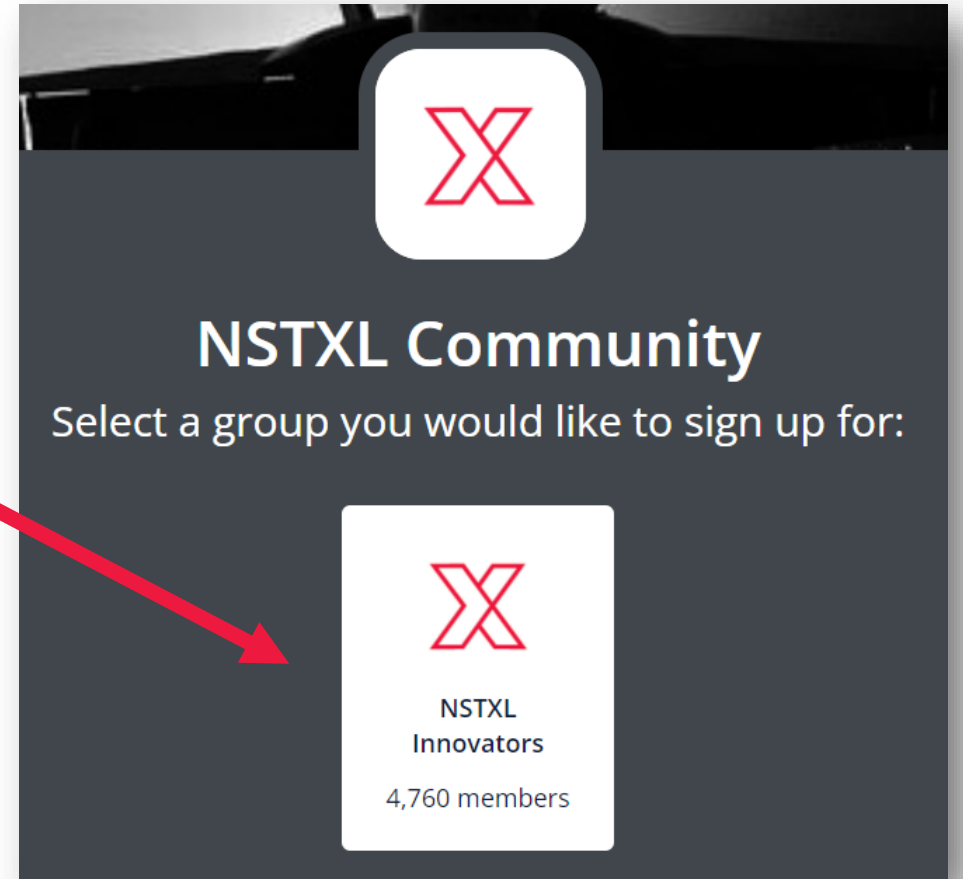

---

- Members-only teaming platform
- Insider access to the NSTXL Innovation Network where you can:
  - Find sustainable partnerships and vet other members skills
  - Collaborate to build new business
  - Ask questions
  - Get immediate opportunity updates
  - Access files and documents

# How to Join

---

1. Go to [community.nstxl.org](https://community.nstxl.org)
2. Select NSTXL Innovators Group
3. Fill out the application
4. Agree to Terms & Conditions
5. Press Continue

# After You Join

---

- Introduce yourself on the NSTXL Innovators Board
- Join a teaming board
- Comment on a post
- Start a private conversation
- Receive email updates about specific opportunities

Attend An Event  
Engage & Team

# Teaming Collisions

---

**Teaming Collisions** events allow members to showcase capabilities specific to Government-identified, forward-looking technical focus areas. Focusing on specific technology areas, each event gives participants a chance to present to and connect with potential new teams to build capability and technology-driven partnerships, all before a government audience.

Virtual Event

## Teaming event

*1:00 pm - 4:00 pm ET on Tuesday*

Hear from, and share your capabilities overview with, traditional and non-traditional SpEC members during this interactive event designed to help you find great teaming partners. Those taking the "stage" will provide a short pitch with a suggested outline provided in your registration confirmation e-mail. (Allotted pitch time will be provided on December 17 and is based on number of presenters registered at that time.)

[Register for Teaming Event](#)

Teaming Collisions	Need	Overview	Outcome
	Engage non-traditional vendors that identify with state-of-the-art technologies and Government needs in advance of an RPP.	Members-only events designed around a specific, upcoming technology challenge that introduce aspiring primes and subcontractors to showcase capabilities and uncover teaming opportunities.	Compatible teams form in anticipation of RPPs and can focus on building the strongest solutions, faster.

# Project TALX

**Project TALX** events ignite conversations around specific opportunities and strengthen efforts to submit well-informed and effective solutions. These virtual industry day programs give participants the chance to hear directly from the government and ask additional questions, leading to more successful projects and eliminating future roadblocks.

Virtual Event

## ROOSTER-4 Project TALX

1:00 pm - 2:30 pm ET on Thursday

Project TALX programs go beyond the RPP to provide members with a more robust understanding of the requirements. These events are designed to help participants better understand the desired outcome of the prototype, directly from the source, and typically include open Q&A with the program team.
