STE LTE FoF RFS Attachment 7 - Vendor Questions and Answers

QUESTION NUMBER	DATE OF SUBMITTAL	RFS SECTION AND PAGE	GENERAL SUBJECT	STATEMENT REQUIRING CLARIFICATION OR QUESTION	ANSWER
1	6/25/19	RFS	Proposed Development Schedule	Please confirm our understanding that the Proposed Development Schedule depicting a multi-focus area solution --- from contract award to final prototype assessment---and assumptions for a multi-focus area solution are outside the page limitations of the Technical Focus Areas.	The development schedule is now excluded from the page count of the technical volume. The assumptions are part of the technical volume and are included in the page count.
2	6/25/19	6.4.1 (pages 6/7)	Proposed Development Schedule	Consistent with the outline in Section 6.4.1 (pages 6/7) of the RFS, we recommend that the Proposed Development Schedule and the List of Assumptions are to be provided as separate proposal sections from the Technical Focus Areas (and outside of the page limitations) to allow offeror the ability to demonstrate a comprehensive solution that delivers capability across all focus areas.	See item 1.
3	6/25/19	RFS	Page Count	For offerors providing comprehensive technical responses across all four focus areas, would the government permit offerors to exceed the 10-page limit in one Focus Area so long as the total page count of the offeror's entire Technical Response does not exceed 40 pages?	No. The page limit is set per Focus Area.
4	6/25/19	Attachment 3	Deliverables	Attachment 3 to the RFS lists the following deliverables: Agreement Deliverables, Prototype Management Monthly Report, Data Package, Future Efforts Report, Software Sustainment Package, and Product Drawings/Models & Associated Lists. However, the last two deliverables---the Software Sustainment Package and Product Drawings/Models & Associated	See Question 5.

				Lists---are indicated as "option".	
5	6/25/19	RFS	Sustain package	Please clarify what is meant by "option" and confirm our understanding that the Software Sustainment Package and Product Drawings/Models & Associated Lists are to be bid as part of the proposal response.	The options within the agreement deliverable attachment are intended to provide the Government the ability to unilaterally buy these items, if needed, at a mutually agreed upon price within the timeframe of the OTA. All items in the Deliverables Attachment shall be bid as part of the proposal. Options shall be priced within the proposal as a severable component of the pricing volume.
6	6/25/19	2.1.1, pg 1	Force on Target Training	When will the Government provide details on the Force on Target training OTA and additional prototyping efforts of the full LTE requirements?	Force on target is not part of this Synthetic Training Environment (STE) Live Training Environment (LTE) Force on Force (FoF) effort. Future efforts have not yet been defined and are unable to be shared at this time.
7	6/25/19	6.7.4, pg 10	GFI / GFE/GFF	Will the Government provide any reports under the Warfighter Focus program addressing the issues associated with Training Aids Devices, Simulators and Simulations (TADSS), specifically MILES, to better inform Offerors about the STE LTE FoF Statement of Need.	If a vendor thinks that reports from the Warfighter Focus program addressing the issues associated with Training Aids Devices, Simulators and Simulations (TADSS), specifically MILES, is critical to their design/prototype success, they should request that information as part of the solution response. However, this information is not readily available and should not have a bearing on the proposed solution.
8	6/26/19	RFS Attach 3	Agreement Deliverables	General Subject – Pricing – Statement - Are the various deliverables identified in attachment 3 to be priced separately from the 4 Focus Area CLINs, i.e., one price per deliverable? Are prices required for those deliverables identified as an "Option"?	The deliverables shall be priced within each focus area CLINs. Options shall be priced within the proposal as a severable component of the price volume.
9	6/26/19	RFS Attach 3	Agreement Deliverables	General Subject – Pricing Statement – If a vendor is providing pricing for multiple Technical Focus Areas are they allowed to bid the price for program management and related tasks as its own CLIN separate from the 4 Focus Areas or are we required to amortize this cost over the various Focus Area CLINs that the supplier is bidding on?	The pricing of program management and related tasks should be amortized across the focus areas in the event that the Government decides to select a subset of a vendor's proposed solutions.
10	6/26/19	RFS page 7	Page limits	Please confirm that Volumes' Cover	The Volumes' Cover pages, Table of

				pages, Table of Contents, Lists of Figures and Tables, Acronym Lists are not included in page limits	Contents, Lists of Figures and Tables, Acronym Lists are not included in page limits.
11	6/26/19	RFS page 10	Assumptions	Will the government exclude Assumptions from Focus Areas page limit?	No. The assumptions are part of the technical volume and are included in the page count.
12	6/26/19	RFS page 10	GFI / GFE / GFF	Will the government exclude GFI / GFE / GFF from Focus Areas page limit?	No. The GFI/GFE/GFF are part of the technical volume and are included in the page count.
13	6/26/19	RFS page 8	Development Schedule	Will the government exclude Development Schedule from Focus Areas page limit?	Yes. The development schedule is now excluded from the page count of the technical volume.
