

## NSTXL COMMUNITY HOW TO FIND TEAMING PARTNERS

### Steps

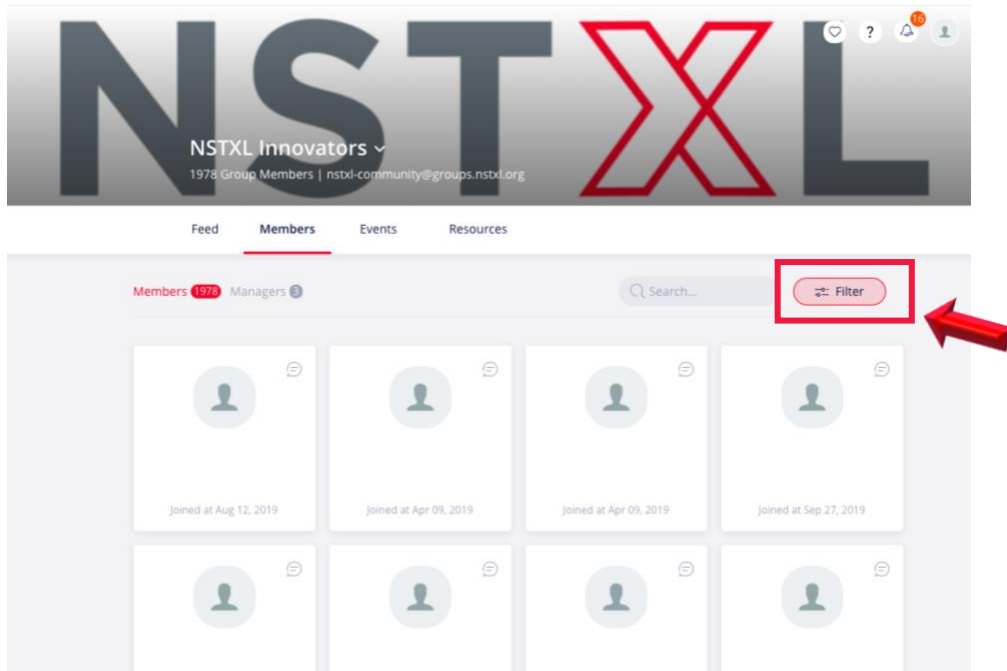

1. Visit [www.community.nstxl.org](http://www.community.nstxl.org) and log into your account.
2. From the Home Page, select the **"Members"** tab to open the entire member database.

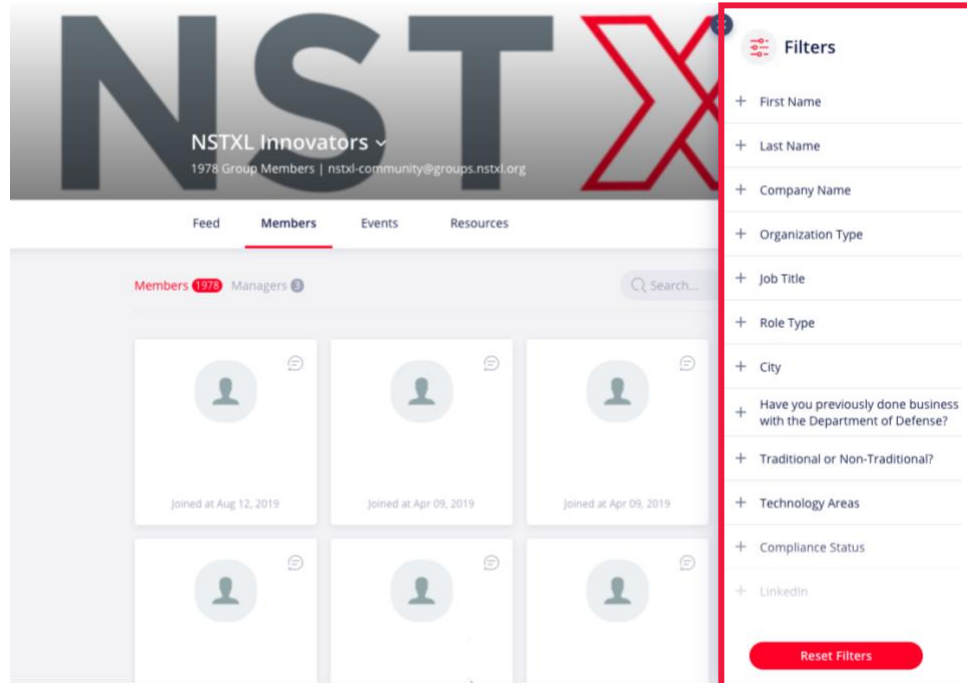

3. Use the search bar to search by a user's name or company name.

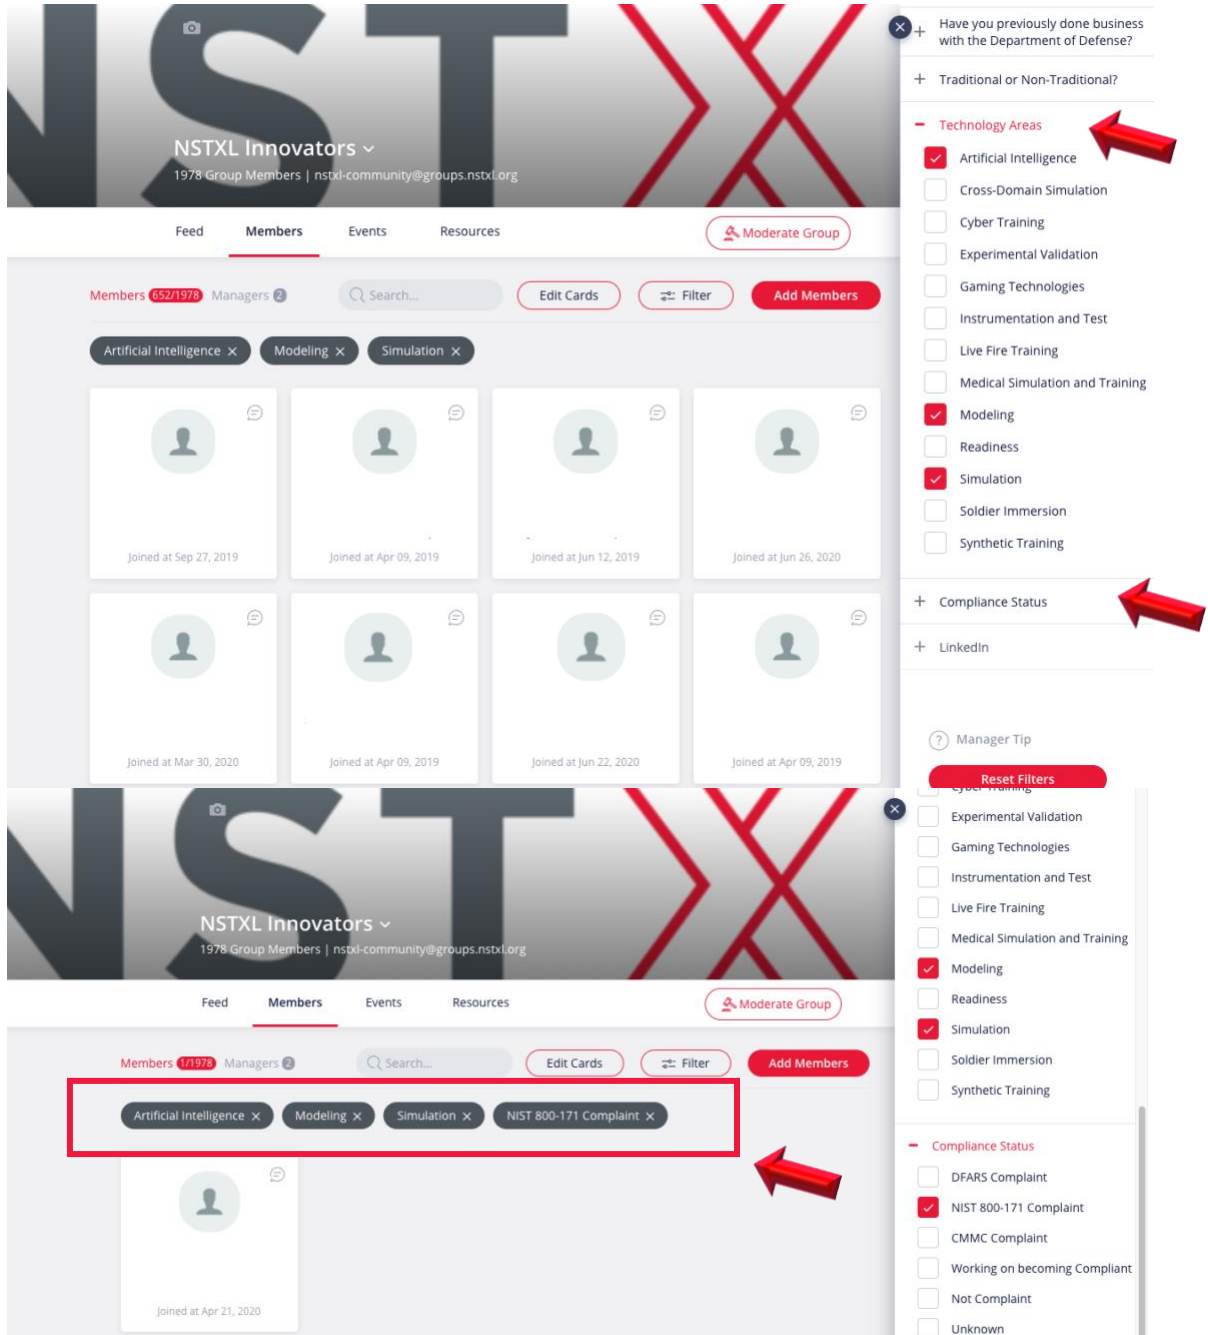

4. Use the filter to refine your search and find teaming partners that match your needs.

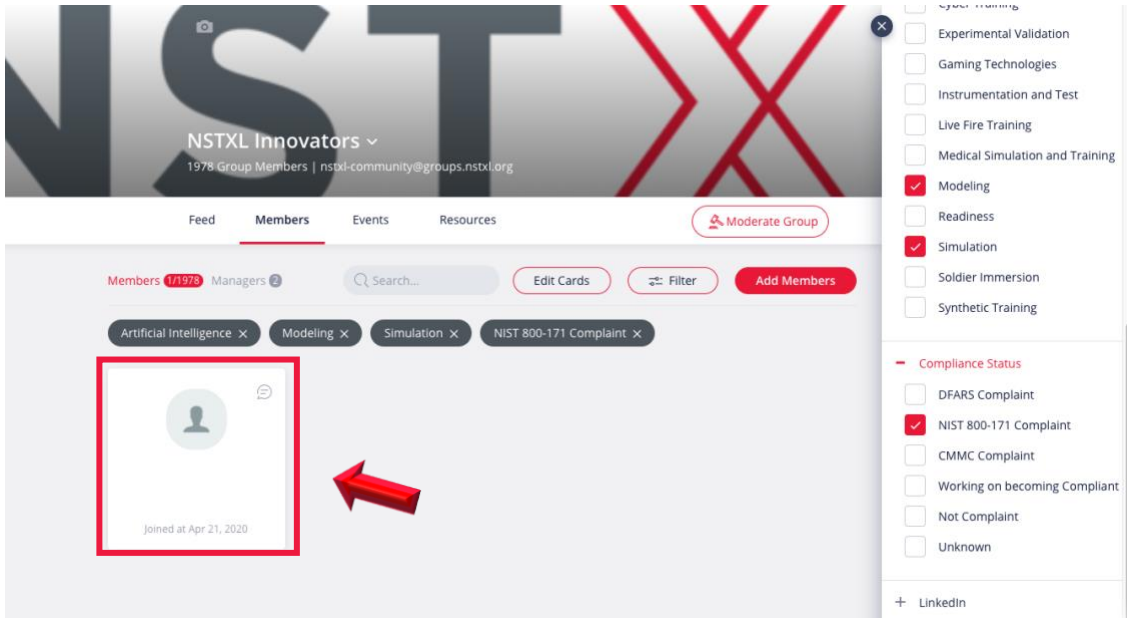

- 5. You can filter by
  - a. Technology Area
  - b. Company Name
  - c. Compliance Status
  - d. And more!

- The filter tool can help narrow down your search results. For example, in the image below, we are only seeing results for companies who have indicated that they specialize in Artificial Intelligence, Modeling and Simulation.
- You can add more than one filter at once to help narrow down your results, such as Compliance Status.

8. Once you find who you are looking for, click on their user card to open their profile.

9. You can review the details in the user's profile and then click on the **"Message"** button to start a private conversation.
